Education

- Bachelor, Mechatronic Engineering, Zhejiang University 2010-2014
- PhD, Mechanical and Automation Engineering, The Chinese University of HK 2014-2017

Research Interest

- State estimation for robotics, visual inertial navigation, visual SLAM

Project Experience

Humanoid Football Player Development 2012-2014
Zhejiang University

- Our team, *ZJUDANCER*, develops kid-size humanoid football player robots
- My work is to design robot mechanical structure, build 3D model in SolidWorks, draw machining drawings and contact with manufacturers for parts manufacturing, assemble and maintain the robots. I'm the mechanical group leader in 2013-2014
- Championship in 2013 RoboCup China; Top 8 in 2014 RoboCup in Brazil

Tactile Sensors Test Platform Development 2013-2014
Zhejiang University

- My final year project, developing a mechatronic platform with 3-D translation and 3-D rotation, which can precisely move the stimulator tip to execute test work of required motion on tactile sensors
- I worked on both the hardware and software development of the platform

Visual Motion Estimation for Ground Vehicles 2014-2017
The Chinese University of Hong Kong

- My PhD thesis topic is to develop a robust odometry/IMU assisted visual motion estimation system for navigation of ground vehicles

Working Experience

Robotics Intern 2013
Atlas Copco (Wuxi)

- Develop a robotic arm prototype for deburring compressor rotors
- Design a six-servo robotic arm model with my partner; achieve the algorithm for inverse kinematics; program in Arduino for control motion; program in Qt to create interface
